Wines, Beers & Spirits

There is no need to print this sheet. Only the first pages should be in the package.

Delivery time and address

When you register your products, you will receive an e-mail from us with a dispatch note containing all the important information about the delivery time and address.

Do not hesitate to send in samples, or deliver them yourself, in advance of the deadline. If there is a problem during the delivery (damage, loss, held at customs, sample error...), we have time to find a solution.

Quantity of samples

Wine: 3 bottles labelled per sample

Beer: 3 bottles labelled per sample

Spirits: 2 bottles labelled per sample

Please always send your bottles upright, never lying down, as this significantly reduces the risk of glass breakage. There are no requirements for packaging type or capacity. You may send a bottle, can or any other type of packaging, with a capacity of at least 25cl.
